

STORAGE BINS

Storage bins are a useful way of keeping loose items safe within a freezer. Storage bins are manufactured from anodised aluminium or stainless steel. All storage bins have either a fold down handle or hand grip. Bins can be designed to have a handle on each end for transport if required. All storage bins are fitted with a label holder so the user can easily identify which bin they require. Storage bins can be designed to fill the height of any freezer compartment or be smaller and stored in a horizontal cold store.

Storage bins can be manufactured to any size required, our standard size bins are 140mm wide and 280mm wide however many more are available, visit our website to view the most popular range of storage bins.

Drop on lids and hinged lids are also available if required and can have an option to be locked to keep items inside safe. Inserts can be added to the storage bins to divide it into sections making it easier to separate items.

If you require an aluminium storage bin it can be produced in a range of colours including black, red, gold, blue and purple. Aluminium bins are considerably lighter than stainless steel which makes them easier for transportation.

Storage Bin Size	Part Number
235h x 175w x 560d	BIN 180
